

DUR - *ability*

- Hot dipped galvanized high-tensile steel frame will outlast any conventional bin.
- The tough and durable high-tensile base has proven itself over a 13 year period in the automotive industry.

- The bag is treated with UV stabilizer, and will withstand at least 5 years' direct sunlight exposure.
- In the folded form, the bag is not exposed to direct sunlight thus ensuring prolonged lifespan.
- **Never replace a bin again - only replace the bag.**
- **The bag is the least expensive part of the Omega bin - only 12% of the total cost of the bin.**
- The Omega bin can be stored in the open or in cold storage without any deterioration or negative effect on the bag or frame quality.
